

TOOLS USED :

Programming and development:

- Java (JDK 25), the core language for the whole project
- Visual Studio Code with the Extension Pack for Java, for writing, compiling, and debugging
- Windows terminal / PowerShell, for compiling (javac) and running (java Main products.csv)

Data:

- CSV file (products.csv) holding the 2,175-product catalog
- Core Java libraries only (java.util, java.io, java.nio), with no external libraries or database

Version control and documentation:

- Git and GitHub, for version control and hosting the project and README
- Microsoft PowerPoint, for the presentation
- Claude (AI assistant), for code generation, debugging, and documentation support
